

PRESS RELEASE

ENCO expanding in Australia , New Zealand and the South Pacific; adds support of Auricon Soundcards

Southfield, Michigan, June 26, 2006: ENCO Systems Inc., a leading worldwide provider of Digital Audio Delivery Systems, announced that Innes Corporation of Australia has been appointed distributor for ENCO radio and television audio automation systems throughout the South Pacific Region. Innes Corporation will provide a regional sales and support facility to address growing demand for ENCO products in the region. ENCO will also add support of the Innes Auricon® line of broadcast quality sound cards within ENCO's DAD system.

"At Broadcast Asia 2006 Innes Corporation was proud to be announced as ENCO distributor for their digital audio automation systems in Australia and New Zealand. We believe that this partnership will give our Australian and New Zealand clients access and support to the outstanding ENCO product range that has been dominating the US radio and television market for a long time. The ENCO DAD system seems to be the perfect automation and playout system for radio and television in our region and caters for all of our customers from small community stations to large networks. Innes Corporation staff and management are looking forward to a successful and prosperous business relationship with ENCO Systems," says Patrick Salloch, General Manager of Innes Corporation. "The ENCO DAD system is used in Australia on some of the highest rated television shows. Innes Corporation believes that the DAD system will give Broadcasters a welcome alternative to over-priced automation systems currently sold in Australia."

"Having a strong dealer in Australia and New Zealand is a key part of our global strategy, and we are excited that Innes Corporation has chosen to partner with ENCO as our dealer and distributor in that region. Besides the obvious strength of the sales and support that Innes provides, their own ENCO supported Auricon sound card family will further broaden the choices available to DAD users worldwide. With a number of key Australian DAD users already, joining with Innes can only strengthen our position in Australia and New Zealand."

About Innes Corporation (www.innescorp.com.au)

Innes Corporation design and develop a diverse range of products uniquely tailored for the Broadcasting and Audio Industry. All are quality assured with an excellent reputation for reliability and ease of use to meet broadcasting and professional audio needs. Innes Corporation has developed program logging recorders, Microsoft certified professional PCI sound cards, AM/FM radio capture cards, processing equipment and audio watermarking software for film, TV and radio. Based in New South Wales, Innes offers consulting services Australia-wide, whereby broadcast engineers, radio stations, radio networks, recording studios and/or media monitoring companies can take advantage of our broad knowledge and experience.
