

## ***PRESS RELEASE***

### **ENCO Partners with Wicks Broadcast Solutions and Powergold® to Create StreamLine®, an Integrated Automation, Music Scheduling and Traffic System Solution for Radio Broadcasters Worldwide.**

Southfield, Michigan, February 6, 2006: ENCO Systems Inc., a leading worldwide provider of Digital Audio Delivery Systems, today announced partnership with Powergold Music Scheduling Software, and Wicks Broadcast Solutions to produce StreamLine®, an integrated system addressing all aspects of radio automation, music scheduling and traffic management. StreamLine will combine Powergold® Music Scheduling and Wick's Visual Traffic® with ENCO's DAD® radio automation system to deliver a complete integrated radio management and automation solution.

StreamLine integrates DAD's Library, Import, Export and Playlist functions with Visual Traffic spot entry and log management. Similarly, Powergold's music scheduler can automatically drive and update DAD playlists. Delivered as a single integrated solution, StreamLine frees broadcasters from managing multiple discreet applications and interfaces, eliminating errors and synchronization issues.

StreamLine will be available in Q1 2006. StreamLine runs on standard PCs with Windows 2000® or Windows XP Pro® operating systems.

"Many of our customers here, and in emerging worldwide radio markets, have been asking for a single integrated answer to their automation, programming and traffic requirements. Integrating DAD with Powergold and Visual Traffic creates an ideal solution to meet the most challenging needs of global broadcasters. We are excited to be working with such fine partners and their world class technologies" said Gene Novacek, President of ENCO.

"We know that ENCO, Powergold and Wicks are industry leaders in their respective markets and our products benefit from seamless integration. Our common goal is to provide our customers with the very best broadcast solutions available, and we're proud to be a part of this team", said Wicks CEO, Pete D'Acosta.

Wicks Broadcast Solutions is an affiliate of The Wicks Group of Companies, L.L.C. of New York which specializes in communications, information and media businesses.

"This partnership with ENCO and Wicks will provide a one-stop, turnkey solution for broadcasters of any size," said Jimmy Edwards, General Manager of Micropower Corporation, "Users will benefit from the tight integration among our products."

Powergold Music Scheduling Software, a product of Micropower Corporation, has been serving the broadcast industry for over 17 years with advanced music scheduling for Windows. With clients in more than 50 countries, Powergold is the premier choice for multi-tasking, multi-user music scheduling technology.

ENCO Systems is a leading provider of Digital Audio Delivery Systems for demanding television and radio organizations worldwide. ENCO is headquartered in Southfield, Michigan with offices in California, Minnesota, New York, and the United Kingdom and retains distributors throughout the world.
